Part B. CV SUMMARY (max. 5000 characters, including spaces)

I started my research activity in 1989, thanks to a scholarship, developing 3D photogrammetric technologies for the analysis of movement. In 1990 I started doctoral studies. In 1991 I was awarded a Predoctoral Scholarship (FPI) from Junta de Andalucía (Spain). I read my thesis in 1995, focused on the development of biomechanical systems applied to sports.

My main research line has been oriented towards Sports Biomechanics and Technological Development for Movement Analysis. Biomechanics is an internationally consolidated research area (UNESCO code: 240604). In recent years I have broadened my research lines into the field of Ergonomics, Performance Analysis-Optimization, Musculoskeletal risk prevention, Health promotion through Physical Activity, Virtual Advisors, Artificial Intelligence applied to Sports, and Exoskeletons. My last projects, in which I participate as Principal Researcher (IP), go in these directions.

My undergraduate and graduate university teaching activity, has been mainly linked to Sports Biomechanics and other related subjects such as: Ergonomics and Physical Activity for Health.

These are my most outstanding actions of my research activity:
